Bhopal, Dated 22/03/2013

Message

Central Frozen Semen Laboratory, Bhopal is among the leading graded Semen Laboratories in India, producing 12 Lac semen and it intends to enhance its production to 25 lacs doses in the coming year.

It is heartening that MP State Livestock & Poultry Development Corporation is publishing a directory of Sires of various cattle and buffalo breeds. This directory will help to enrich the knowledge of various A.I. workers, NGOs and other individuals engaged in Animal Husbandry sector.

I appreciate the efforts of M.P. State Livestock and Poultry Development Corporation for publishing this directory and would be very keen in observing the growth it is going to bring in our state in the months to come.

Message

It is a matter of immense pleasure that the M P State Live stock & Poultry Development Corporation is publishing a Sire Directory for Central Semen Station, Bhopal having pedigree information of the bulls documented in a comprehensive manner.

Brief information on pedigree and genetic potential for milk of 91 sires viz. Sahiwal, Gir, Malvi, Nimari, Kenkatha, two exotic breeds (Jersey and Holstein Friesian) and their crossbreed bulls along with sires of Murrah, Jaffarabadi and Bhadawari breeds of buffaloes are included in this directory.

This directory will be useful for the farmers, AI workers, departmental field functionaries and other stakeholders for selecting the semen of proper breed and sire of their choice. I am sure this effort will go a long way for breed improvement in the State.

I take this opportunity to place on record my appreciation for the initiative taken by the Managing Director and his team for publishing this directory in a short time and hope that it will be updated periodically.

I wish all the success to Central Semen Station, Bhopal in their endeavour to provide high quality semen.

Message

Dated 05-04-2013

I am pleased to learn that MPLPDC is publishing Sire Directory of various cattle and buffalo breeds, which will help livestock keepers. All workers, NGOs and other stakeholders is selecting sire for the genetic improvement among their bovines.

It is also good to note that Central Semen Statron is enhancing Frozen Semen production by more than two times, that is, from present production of 12 lakh dosage to 25 lakh dosage in near future, which is a timely decision taken by the MPLPDC, keeping in view the future needs of the superior germ plasm to enhance productivity of the bovine breeds.

Initiative take by MPLPDC to publish Sire Directory is appreciable and I congratulate the whole team for this work.

(Prabhanshu Kamal)

Bhopal, Dated 05/04/2013

Foreword

Animal Husbandry and Dairy sector is an integral component of agrarian economy of the country and the state. This sector has emerged as one of the key components of agricultural growth in the country and plays a critical role in the socio economic development and welfare of rural population. As a result of gradual transition from subsistence to market system the economic dimensions of livestock keeping have gained significance. To make dairy enterprise more profitable, milk production potential of our dairy animal should be high which can be achieved by use of proven pedigreed bulls with higher sire Indices.

Key factor affecting productivity is the genetic ability of the animal for milk production and enabling environment. The semen of elite bulls contributes significantly to milk production potential of its progenies. Hence use of frozen semen produced from such bulls is very important in any breeding program.

The main objectives of the station are to introduce superior germplasm in Madhya Pradesh. The demand of semen in the state is being met by the Central Semen Station, Bhopal as per the breeding policy of the State. The station is maintaining strict Bio-security measures inside the lab and bull shed area.

The organization is 9001-2008 ISO, HACCP Certified and maintaining disease free bulls of high genetic merit. Annual production at CSS, Bhopal is more than 12 Lakh frozen semen doses, which are sold out in the state covering only 20% of the breedable population. This coverage is proposed to be increased to 35% by the end of 12th Five Year Plan.

I extend my best wishes and congratulate executives of Corporation Head Quarter, Veterinarian at CSS and other staff members for publication of sire directory 2013-14 to provide first hand information of their bulls.

Dr. H.B.S. BHADORIA
